Contents:

IJIPM: Editorial Board ........................................................................................................1

A Simulation-based Performance Analysis of Multicast Routing in Mobile Ad hoc Networks ..........................................................4
  Natarajan Meghanathan

A Model for Manageable Dependability of IT Services Associated with Social and Economic Infrastructure ........................................15
  Hiroshi Ohtaka, Koichiro Oshika, Masashi Gotou, Tsutomu Yoshitani, Yoshiaki Fukazawa

Study on Feature Selection Algorithm in Topic Tracking .............................................................25
  Shengdong Li, Xueqiang Lv, Yuqin Li, Shuicai Shi

Thai E-san Heritage Images Classification based on Color Features Analysis: The Normalized R/G Ratio and Edge Histograms .................................................................34
  Jantima Polpinij, Chumsak Sibunruang

Interoperable map interface towards the data quality of internet geospatial resource: a metadata perspective .................................................................42
  Jung-Hong Hong, Hsiung-Peng Liao

Selection of De-noising Methods of Signals in Fault Diagnosis of Motor ........................................55
  TIAN Mu-ling, Yang Jie-ming

MPCS: Secure Account-based Mobile Payment System ............................................................59
  S.Britto Ramesh Kumar, S.Albert Rabara

A Novel Method for Video Retrieval Using Relevant Feedback .................................................70
  Yixin Yan, Yongbin Shen, Shengming Li

A Case Study of the Deployment of PDA Accessible Clinical-Log for Medical Education in PBL-Approach .................................................................77
  Rattiporn Luanrattana

Research on Intelligent Diagnosis for Early Faults in Three-phase equipment ........................................86
  Tian Mu-Qin, Lan Yu-fei

Computer Games: A New Medium for Traditional Asian Art ..............................................91
  Conrado R. Ruiz, Jr., Sujitra Chodnok, Nor Hidayu Salimi, Pham Trung Ha

The Early Fault Diagnosis Method of Induce Motor Based on Gray Prediction Nerve Network .................................................................100
  Lin Ling-yan, Song Jian-cheng, Tian Mu-qin
An Agent Oriented Approach for Implementation of the Range Method of Initial Centroids in K-Means Clustering Data Mining Algorithm

Dost Muhammad Khan, Nawaz Mohamudally

Optimizing Opto-Electronic Cellular Neural Networks Using Bees Swarm Intelligent

Hanan A.R.AKKAR

3D Emotional Rendering Method Utilizing Coloration and Shading to make Virtual Character Design in Culture Contents Development

Yong-Tae Won

Detection of Duplication in Documents and WebPages Based Documents Syntactical Structures through an Improved Longest Common Subsequence

Mohamed Elhadi, Amjad Al-Tobi
