Contents:

AISS: Editorial Board ................................................................................................................ i

AISS: Call For Paper & Special Issue ...................................................................................... v

Model Checking the Reliability of Interactive Behaviors for Mobile Computing .................. 1
Honghao Gao, Huaikou Miao, Shuoping Wang, Jia Mei, Yang Liu

Burner Flame Recognition and combustion diagnosis Based on Back Propagation Neural Network ......................................................... 13
Li Yang, Jinxue Sui, Zhilin Zhu

An Entity Resolution Model based on Time-Sensitive for Telecom Fraud Crime Investigation ........................................................................ 23
Gang Wang, Jiliu Zhou, Shaojie Qiao, Chongjun Wang, Wei Bai

XML Storage Model Analysis and Comparison .................................................................. 30
Yueling Zhang

An Aggregation Method for Dynamic Bus Arrival Time Prediction ................................. 37
Ma Zhenliang, Xing Jianping, Yan Shihao, Wu Yong, Wu Yubing

Developing a Tour Guiding Information System for Tourism Service using Mobile GIS and GPS Techniques .................................................. 49
Tzu-How Chu, Meng-Lung Lin, Chia-Hao Chang, Cheng-Wu Chen

TOPSIS Method for Chinese College Teacher Performance Appraisal System with Uncertain Information .............................................. 59
Xiaofei Li, Dong Li

A Polynomial Time Solvable Algorithm to Linearly Constrained Binary Quadratic Programming Problems with Q being a Tri-Diagonal Matrix ........................................................................ 65
Shenshen Gu

Blind Adaptive Anti-jamming GPS Receiver based on Power Minimization-Despread Technique ........................................................................ 73
Dan Lu, Ren-biao Wu

UFM: A Frame for Multiple Devices Management based on Intel SDK for UPnP Devices ........................................................................ 80
Yang Xiaodong, Lu Yiqin, Wu Hao, Sun Yingkai
AISS Special Issue 3

Special Issue on ICEIS2011/LISS2011
Guest Editor: Dr. Guowei Hua, Dr. Zhenji Zhang

Architecture for Operation Management in Urban Railway System .......... 88
Min-min XIAO, Shi-feng LIU

China Medicine Pedigree System based on RFID: Analysis and Design .......... 95
Shi-feng LIU

Establishing Food Traceability System based on Game Theory: from the Perspective of Retailers ................................................................. 107
Wei Jinshi, Lan Hongjie

Simulation on the Process of Mobile E-commerce based on Arena ............. 115
Dan Chang, Yan Liang, Sheng Zeng

Simulation Research on Inventory Strategy Decision of Multi-period Fresh Food in Supermarkets ................................................................. 123
Hui Du, Tingting Li, Dan Ding

Model and Algorithm of Competition between High-speed Railway and Air Transport .................................................................................... 132
Jia-nan ZHANG, Peng ZHAO, Yingcan LI

Analysis of Grid-based Mobile Business Process and Research on Process Simulation ...................................................................................... 140
Dan Chang, Li Si

A New Application in Neural Network ....................................................... 151
Dan-dan LI, Run-tong ZHANG, Xiao-pu SHANG

The Comparative Study of Supply Chain between Traditional and Electronic Publishing Industry ................................................................. 160
Chuan-chen WANG, Run-tong ZHANG, Dan-dan LI

Business Orientation of Logistics Development for State Reserve Warehouse in China .............................................................. 167
Sui Cui, Ding Jingzhi

Structural Description and its Application of Urban Traffic Scenarios ........ 174
Juanqiong GOU, Yingcan Li, Jingyi REN
Research of Smart Space based on Business Intelligence .......................................................... 181
Jia-yi YAO, Tian-tian MA

From Selling Products to Selling Services: A New Retail Business Model .......................... 187
Xin Tian, Yu-zhang Ding

Research on Profits Allocation of IOT Industry Chain ............................................................ 197
Sun Qin, Lu xiyan

CALIS-based Cloud Library Services Platform Model ......................................................... 204
Ying CHEN, Run tong ZHANG, Hao yue LI, R uixia LI, Yu hong GAO

Discussion of Urban Tourism Public Service Facilities Construction .............................. 213
Xuefeng Wang

Engineering Supervision of Information System ................................................................. 220
Xiao-min ZHU, Dan-dan LI

A Study of Supply Network Integration Solution—An Example of a Large State-owned Enterprise ................................................................. 228
Jingchen Gao, Jie Xu

Saturation Analysis of Network Information Diffusion and Modeling ......................... 237
Jin-lou ZHAO, Zhi-bin LIU, Jian-nan YU

Emergency Logistics Systems Synnergetics Research ..................................................... 245
Li Hanqing, Ru Yihong, Han Jihua

The Research on the Interaction Effects of Rural Logistics and Economic Development ..................................................................................................................... 251
Xuegang Chen, Jianqin Zhou

An Empirical Research of the Influence Factors of the Action from MF Network Collaboration to Logistics Organization Performance .............................................................. 259
HU Jia-ji, BIAN Wen-liang, HAN Shi-yi, JU Song-dong

Design of Dynamic Distribution Network for Service Resources .................................. 266
Lianru Liu
Zhao Dan

Research on Driving Force Mechanism of the Network Public Opinion Waveform based on Wave Mechanics ................................................................. 278
Honglu Liu, Zhihong Tian, Dongpo Xiao

Research on the Mechanism and Optimization of Knowledge-sharing Network of Research Teams based on Social Network Analysis ..................................... 285
Zhihong Tian, Zhenji Zhang, Jingyuan Zeng

Government Information Resource Integration Research based on Government Website ........................................................................................... 294
Ran Tang, Zhenji Zhang, Yutao Dong

Analysis of the Economic Benefit of Used Batteries based on Reverse Logistics ........................................................................................................ 301
Xianliang Shi, Zhihua Li

DSUB: A Noise-immune Method to Measure Concept Drift .................................. 311
Gao Xuedong, Gu Shujuan, Wu Sen

Vehicle Routing Problem with Multi-Depot and Multi-Task ..................................... 320
Haoxiong Yang, Yongsheng Zhou, Zheng Cui, Mingke He

An Algorithm to Detect Community by Geodesic Line in Social Networks ............. 328
Zhang Qi, Ma Ying-Hong

Travel Mode Choice of High-speed Railway Passenger Modeling with Support Vector Machines .................................................................................... 334
LI Jing, KANG Shu, LIU Mei

Dynamic Pricing for Perishable Products with Cancelations and No-shows ........................................................ 341
Shuaqin Liu, Shouyang Wang

Agent-based EPC-RFID Network for Smart Awareness System ............................. 349
Xiaopu Shang, Runtong Zhang, Donghua Chen, Ying Chen

Study on Economic Disparities of Inbound Tourism in China based on the Gravity Center Model ................................................................. 357
Yining Chen, Hui Zhang
The Performance Evaluation of Integration Agricultural Base with Supermarket based on DEA ................................................................. 364
Yuetan Lin, Wenbing Wu, Mingyu Zhang

An Overview of Performance Management Development ............................. 374
Tong Xue, Yanping Liu, Si Ha, Chaozhong Zheng, Xiaoyun Li
